### Acadia Liberal Assn. Convention Addressed By Bowlen & Gray

Great interest in the Liberal cause was shown by the large attendance at the Federal Liberal Association Convention held in Hanna on Wednesday, Sept. 1st. Representatives present, all parts of the constituency — Consort, Coronation, Castor, Veteran, Munson, Chinook, Craigmyle, Oyen, Delia, Youngstown, Acadia Valley and other points.

Resolutions dealing with rehabilitation, irrigation, relief and bonuses for farmers on land where crop failed were passed, also expressions of appreciation of services of J. J. Bowlen, Hon. Norman Rogers and J. G. Gardiner and whole hearted indorsement of E. L. Gray as leader of the Prov. party.

Officers elected were as follows:

Pres. W. J. Winning, Cassford; Vice Pres. C. H. Dunn, Sullivan Lake;

Sec. W. O. Turner

Regional Vice President — Stettler — E. H. Matias; Coronation — J. McDonald, Hand Hills; — E. H. McDermid, Acadia — Geo Campbell

Mr. Bowlen in his address, scored the Prov. Government for much futile legislation — passed — debt reduction licensing bill, scrip covenants, etc. — all these, he said had passed into oblivion. He regretted the loss to the Govt. of such men as Crockfield, Ross, Chant and Hugill. He said he had started the investigation into the cost of highway construction when the Govt. after repeated requests failed to produce a report of the cost of road construction.

Mr. Gray in his address, spoke of the injustice to the small, needy investor by the Government treatment of Prov. Saving Certificates. The Eastern Irrigation Co. had invested \$125,000 in these for "security".

He strongly objected to the action of the Government in hiring men from the University of Minnesota to prepare the brief on taxation when our own men were equally if not more capable.

Mr. Gray defined politics as "the study and conduct of public affairs", this study no one could afford to ignore.

Speaking of the planks in the platform Mr. Gray quoted "Rehabilitation as the main and said if the Liberal Govt. returned to power it would only be a matter of months until an engineer was placed in the field between the Red Deer and Sullivan Lake to see what could be done.

He believed the problem of unemployment, relief could be solved by the development of our forest and water resources and that revenue derived from gas, car licenses, etc. should be used for the improvement of roads.

### Chinook Women's Institute Held Meeting

The September Meeting of the Women's Institute was held on Wednesday, Sept. 8th with Mrs. Mortimer as hostess. There were six members and two visitors present.

Owing to the fact that the convenor for 'Canadianization' had moved away there was no program. Material was distributed among the members to be made up for the bazaar which will be held later in the year.

A dainty lunch was served at the close of the meeting.

### New Breed of Sheep for Canadian Farmers

Shown above on their arrival in Canada in the Canadian Pacific Steamships freighter Beaverbrook are several sheep that will mean a great deal to Canadian farmers in the future. They are a gift to the Province of Ontario from the Kerry Hill Plock book Society in North Wales and are an outstanding breed of general utility sheep, which, due to their adaptability to any environment, are expected to gain rapid favor in this country.

The gift of the pen of ten ewes and one ram was arranged through the good offices of W. Rupert Davies, president and editor of the Kingston, Ont. Which-Standard. These prize winners, producers of generations of breeding with the most careful methods of selection being exercised, are destined for the Ontario Agricultural Society at Guelph, from where the strain is expected to spread to other parts of the country.

An idea of the economic and eugenic value of the gift pen may be derived from the fact that the eleven animals took first prize at the annual Kerry Hill Sheep Fair where some 10,000 to 15,000 sheep were shown. Besides being able to withstand bleak weather, these sheep are handsome and symmetrical, and will, it is felt, prove of great value to Canadian farmers.

## Nature As Handmaiden

The late Luther Burbank, whose memory is revered the world over and whose labors are perpetuated to the service of mankind in the form of new and improved fruits, flowers and shrubs is, or should be, a source of inspiration to thousands of people, not only in his native United States, but in Western Canada and other countries of the globe.

The knowledge of Burbank's work with plant life to some degree is almost universal, but only those who have studied his life and achievements or who have visited his Santa Rosa gardens in California, now owned by the Santa Rosa Junior College and open to public inspection, can appreciate to the full the benefits that he has conferred upon humanity.

In two particulars, as pointed out by the College authorities, Mr. Burbank differed from any man who ever worked with plants to improve them; first, he learned from a study of natural laws how to speed up their development so that he could accomplish more with them in a short space of time; second, he did all his experiments on a wholesale scale. Because of this, he was able to accomplish during his lifetime what others could not even approach.

Burbank carried on as many as a thousand experiments at one time, growing perhaps ten or fifty or a hundred thousand plants in each experiment. He crowded the life-work of three or four men into one span of life more than fifty years. Besides this he studied, wrote, lectured, met thousands of people, interested himself in worthwhile enterprises, in children, in animals; learned about other men and other occupations and activities so that he could talk with and enjoy almost any man or woman who came to see him—in short, filled his life with interests and a knowledge such as few have ever found time for.

In the Santa Rosa gardens Burbank did most of his work with flowers; in other gardens and particularly on the Experimental Farm at Sebastopol, eight miles southwest of Santa Rosa, he carried on his experiments with fruits. It would be difficult to list all his plant developments and creations. It is simpler to say that there is scarcely a useful plant which he did not study and very few with which he did not do some work.

Burbank was always pointing out that during a lifetime one could not more than scratch the surface in the field of plant experimentation and development, and wrote again and again that young men and women would do well to look into the possibilities of plant breeding if they wanted to do something worthwhile for themselves and their fellowmen.

It is, of course, not possible for every farmer and every townsman who loves a garden to emulate Burbank's example and make plant experimentation a life work, but there is an avenue here for the pursuit of a fascinating adventure in greater or less degree for every man who has a plot of soil available.

It is surprising what results can be achieved, even by an amateur, in the fields of hybridization, cross fertilization and adaptation, even though conducted on comparatively small scale and under conditions which are not always ideal. The amateur experimenter may grow hundreds or even thousands of plants of single species without securing something of value and worthy of perpetuation but, every now and again, Nature has the habit of rewarding the patient and observant student-worker with a prize which more than compensates for many hours of apparently unremitting toil and brings joy to the heart of the breeder.

Even to those who are not so fortunate as to make new discoveries or promote new varieties, such work brings indirect results that are more than worthwhile. For in carrying on such work the earnest and interested student learns at first hand much of the fundamental laws of Nature, and if the student is a farmer, he is able to adapt this knowledge to his commercial advantage. By following these laws he learns how to improve his product and how to reap the greatest benefit from idiosyncrasies of soil and climate.

There is one phase of the work, however, that affords fine opportunities for farmers and townspeople in the prairie provinces and that is the adaptation of native trees, shrubs, fruits and flowers to cultivated enclosures. Comparatively little has been done in this direction in the Canadian west, but such activity, when undertaken with intelligence promises fine aesthetic and utility awards to participants.

It is astonishing what can be done to beautify farm and home surroundings by the use of native varieties. They have the advantage of being indigenous to the soil and of acclimatization and are easily available at no more cost than the labor involved in transplanting and subsequent care.

Isolated experimentation has shown that the size of native flowers and of wild fruits can be materially increased by the use of intensive cultivation, when conditions as nearly as possible approaching the natural are provided, and to this extent at least, there is no reason why every resident of the west should not be his own Burbank.

### Apathy Towards Arson

No Moral Scruples About Obtaining Money From Insurance Companies  
W. J. Scott, Ontario fire marshal, told the Association of Superintendents of Insurance he found the general public "often feels no moral scruples about obtaining as much money as they can from a fire insurance company and view arson with comparatively lenient eyes." Arson trials without juries have given more than 90 per cent convictions, he said. "Trials with juries only 25 per cent, which reflects the attitude of the public towards arson." The fire marshal said a company should require replacement be made by the insured after a fire. He said this would reduce fires and stimulate the building trade.

### Chinese Never Drink Milk

The Chinese are an agricultural and not a pastoral people. What few cattle they raise they milk in the fields. They eat plenty of pork and lamb, but little beef. They do not make butter or cheese, and sell milk, very, very ancient milk, at drug stores as medicine. They don't drink it as we do.

The Clyde ranks an easy first as the busiest ship-building river in the world.

**IF I COULD ONLY GET AN UNBROKEN NIGHT'S REST!**

Up time and again because of kidney and bladder weakness? Your nervous system may be suffering from the effects of kidney and bladder weakness. GIN PILLS will improve your health and give you a better night's rest.

**GIN PILLS FOR THE KIDNEYS**

### To Deep For Cadi

Charge Of Cruelty To Animals Is Dismissed  
"It's too deep a question for me to decide," remarked Magistrate O'Connor in dismissing a charge of cruelty against John Kelley, employee of a midway show at the Central Canada exhibition at Ottawa. Kelley admitted feeding live chickens to snakes which the humane society claimed was cruelty—to the chickens, he claimed death was instantaneous when a big python clamped its lips over a hen and in any event, pythons must have live food.

### Visits Boyhood School

Lieutenant-Governor Of British Columbia Sees Old Classrooms  
His Honor Eric Hamber, lieutenant-governor of British Columbia, went back to school for half an hour on a recent visit to Winnipeg and scanned intently desk tops for the first time in 30 years. "Well, well, here are the old classrooms," he commented, running his hand over the scarred surfaces of the forms, possibly remembering his own furtive pocket-knife signatures. Eric Hamber was born in Winnipeg, and entered St. John's College school, where his father was a master from 1884 till his death in 1913. Headmaster Walter Burman, the visitor's guide, recalled that the lieutenant-governor won his B.A. degree in 1898, specializing in classics.

Must Take Egyptian Name  
Sixteen-year-old Saad Nassar Zulfikar, whom King Farouk will marry next year, will be known as Farida ("The Only One") a royal proclamation announcing the engagement said. The change was necessitated by the fact the name of the queen must be purely Egyptian, while Saad's is of Persian origin.

### A Matter Of Opinion

Writer Says Ethiopia Unconquered Despite Italy's Claim To Conquer

Ladislav Farnog, writing in the Valparaiso South Pacific Mail, says: Italy claims that Ethiopia has been conquered. This is not true. The Italians control the towns and the areas around the towns. The rest of the country is uncontrolled. Only twenty miles from Dessay a strong Ethiopian force commands the main road from Asmara to Addis Ababa. No Italian vehicle can pass.

All over the country bands of native irregulars, sometimes only fifty strong, are harassing the Italians. The "conquerors" can only move in large forces, accompanied by tanks and armored cars, through country previously reconnoitered by airplanes. I learn from a well-informed source that more Italians have been killed since the war officially ended than were killed during the war itself.

New troops are constantly arriving in Ethiopia. These reinforcements consist mostly of older men. Each troopship brings about 1,500 fresh Italian troops. They are immediately put on board a train for the interior.

Ethiopia is shut off from the outside world, and famine is sweeping the country. For two years during the war the crops were neglected. For two years most of them were left to rot. The peasants refuse to work in the regions occupied by the Italians. They are afraid to bring their products to the markets in the towns. A small expedition was sent out from Addis Ababa to requisition foodstuffs. It was attacked and annihilated. Not a man returned to Addis Ababa.

### Marking Borderline

Railway Erects Clever Sign Where England And Scotland Meet

Passengers travelling by the London and northeastern coast route no longer have cause to wonder when they cross the border for the British and Irish railways has erected an unusual sign on either side of the main line route, indicating the actual borderline between the two countries.

The sign, 14 feet wide and nine feet high, is worded "Across the Border at the top in yellow lettering on a black background. On one side of this lettering is the thistle of Scotland, in green and purple; on the other, the rose of England, in red and green.

Beneath the thistle is St. Andrew's Cross in blue and white, and below this a Scottish uniform (white and gold on black) with an arm pointing towards Scotland. The lettering "Scotland" is in black letters on a yellow background. Beneath the rose is St. George's cross in red and white, and the British lion rampant, in red and gold on black. On one side similar arm lettered "England."—Detroit Saturday Night.

### Pensions For The Blind

Ontario And Manitoba Have Arranged To Pay Pensions

An order-in-council providing for a system of pensions for blind persons became effective in Ontario as the provincial department of welfare moved to receive the pensions, set at \$20 a month. The Dominion government will pay 75 per cent of the cost. It is expected Ontario's share will be \$300,000 annually.

Applications will be received early in September by the old age pensions committee, acting under the direction of the welfare department. The only qualification for a pension is that a man or woman must be totally blind. Payments were expected to be begun in September. It was announced Ontario municipalities would not have to bear any of the cost.

Manitoba started paying pensions to the blind Sept. 1 under terms of legislation passed by the federal government at the last session.

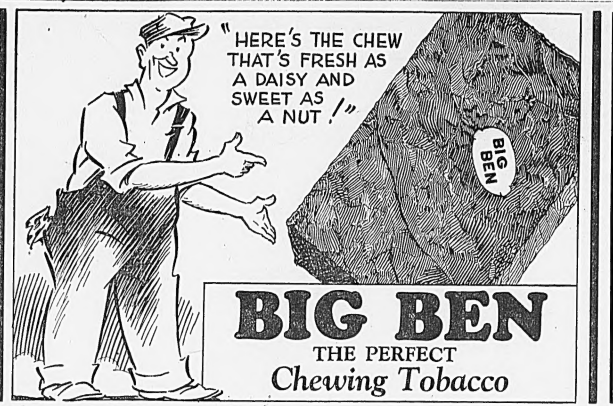

All blind persons more than 40 years of age will receive pensions of \$20 a month. The Dominion government will pay 75 per cent of the cost and the Manitoba government the balance.

"Fog bows" sometimes are visible during fogs, but, due to the smallness of the water drops, these bows are white, instead of brilliantly colored.

The quality of the sleep we enjoy is more important than the quality. Slumber disturbed by dreams is a sign that the brain is still active.

The folding fan was invented in the seventh century by an ingenious Japanese artist, who got the idea from observing a bat closing its wings.

The bicycle sulky still in use in harness racing made its first appearance in 1890.

**BIG BEN**

**THE PERFECT Chewing Tobacco**

### A Giant Locomotive

Germany Claims It Is Fastest In The World

A new giant locomotive of revolutionary design has been completed by the Borsig Locomotive Works of Berlin. During trial runs, the giant on rails attained a maximum speed of 125 m.p.h., which makes her the fastest steam engine of the world.

The machine is perfectly streamlined, even the undercarriage being included in a light metal casing to reduce wind resistance.

Contrary to standard locomotive design, the control stand has for the first time been placed in front of the boiler, so that engineers have an unrestricted view of the tracks before them, a point which is claimed to be absolutely essential at over 120 miles per hour. The smoke stack protrudes from the rear of the monster to which the coal tender is coupled.

Coal dust is for the first time in German railroad history being used in this engine to heat the boiler. With this new system, the works engineers claim, the engine can be steamed up for work within half the time necessary to prepare standard type coal burning engine. Most of the work heretofore done by firemen is performed by a mechanical transport band which automatically feeds the exact quantity of coal dust which the fire needs in order to keep steam at required pressure.

The coal dust is obtained by simply pulverizing ordinary coal. On its way from tender to the engine's fire chamber the coal dust is automatically heated up to 176 degrees Fahrenheit before a blower finally hurls it directly into the fire.

### A National Asset

Retention Of Conservative Leadership By Mr. Bennett Cause Of Satisfaction

However much they differ, and must differ, on political issues, there is no seriously-minded Canadian who does not welcome the news that Mr. Bennett has decided to retain his place in Canadian public life.

The improved state of Mr. Bennett's health after his visit to this side of the Atlantic is happily most apparent, and his supporters had no hesitation in rejecting his offer to resign the Conservative leadership if that step were desired. His political associates naturally rejoice at the fact that (in the words of their resolution) Mr. Bennett's health makes it possible for him to continue to give his "great talents and unrivalled experience of public affairs" to the service of his party and the country.

But the satisfaction goes far beyond the members of the Conservative party. It is a national asset to have a man like Mr. Bennett still directly associated with public life. This question of leadership having been settled, the Conservatives of Canada will no doubt now set themselves to face the new issues that new times have brought.—Canada's Weekly (London).

### Problem For Airmen

Plans Could Sink Battleship If Enough Explosives Carried

Found—an admiral who is willing to concede that aeroplanes can sink battleships.

There's a catch to it, however, for Rear-Admiral W. T. Chiverus, newly-appointed commander of the Philadelphia navy yard, says the aeroplane must first get enough explosives close enough to the ship to send it to the bottom. That's the big problem for the airman.

"You can't load an aeroplane down with enough explosives to put a dent in a vessel's side and then send it 1,000 miles out to sea to look for a ship," he maintains.

The Chinese dolphin, though blind, is able to catch and devour fish that have normal eyesight.

### ALICE STEVENS' RECIPES

#### FRUIT RELISH

10 ripe peaches  
6 ripe pears  
16 ripe tomatoes  
6 cups white sugar  
2 teaspoons salt  
2 red peppers  
2 teaspoons allspice  
2 teaspoons cinnamon  
4 cups vinegar

Wash vegetables and fruit. Blanch tomatoes and peaches and remove skins. Peel pears and remove tongue and seeds from peppers. Chop all (not too finely) and add sugar, vinegar, spices and salt. Boil slowly for two hours. Seal while hot in sterilized jars.

#### DINNER MENU

Liver Casserole  
Baked potatoes  
Creamed carrots  
Brown bread and butter  
Apple crumb pudding  
This menu is inexpensive, tasty, easily prepared and high in food value. All six foodstuffs are represented. Recipes will be sent on request if you write to Alice Stevens and mention this paper.

Readers are invited to write to Alice Stevens' Home Service, Penitence, B.C., for free advice on home cooking and household problems. (Please mention this paper).

### None In Canada

Precautions Being Taken Against Invasion Of Japanese Beetles

Canadian entomologists have been on the hunt for Japanese beetles and are pleased they have found none in Canada. The pests have spread over large areas in the United States and done extensive damage to fruit and other trees.

It was feared they would shortly invade Canada and precautions were taken to fight any invasion from the start. So far none have been found although the discovery of two of the beetles on the deck of a ship arriving at Yarmouth, N.S., recently gave rise to some alarm.

Words pronounced alike but spelled differently and with different meanings are called homonyms.

Deep-sea diving is perhaps the only profession in which it is customary to begin at the top and work down.

**TRY THIS NEW WAXED PAPER PACK**

**PRESTO-PACK**

**YOU'LL be delighted with the simplicity of Presto-Pack — a flat pack of waxed paper — a clean use. Just hang it up on the wall. Then pull one sheet at a time as you require it. You can't pull any more because of the ingenious way it's packed. You can't pull it the hardest thing in the kitchen.**

### Hoarded Gold

United States Makes Midas Look Like An Amateur

If you were to dig a hole—say you have, indirectly—in order to bury some twelve and one-half billions of dollars in gold, you might have some curiosity as to the bulk and weight of the treasure. The gold which the United States has accumulated is in bullion and coins and occupies more space in the Fort Knox subterranean chambers than it would if it were melted and consolidated into a solid block.

The Wall Street Journal has given an estimating attention to this cache. It says that if the gold which Uncle Sam has buried, as a squirrel may conceal a nut, were melted and poured into one block it would form a cube a little less than 27 feet three inches high and wide.

It would fill Secretary Morgenthau's office in the Treasury Building way up to the decorated ceiling. It would be a heavy block, weighing 12,117.5 tons or (if you care to multiply) 24,235,000 pounds. It is, all but literally, enough gold to "sink a battleship," though it may occupy limited space.

It is in a hole in the ground, and the buttermilk may grow above. It is there to serve a purpose in being out of sight. Uncle Sam may smile and remark that Midas and Siegfried were amateurs.—Oakland, Calif., Tribune.

### Same For Centuries

Temperature Of Curative Waters At Swiss Spa Never Changes

The Tamina gorge near Ragaz Spa is one of the strange examples of erosion in the Swiss Alps, and at the same time more or less mysterious. The curative waters flow from a crevice in the rocks at the rate of 10,000 quarts per minute, at a temperature of 93.5 degrees Fahrenheit. No change has been noticed in all the centuries during which the spa has been visited by recreation seekers.

An ounce or more of salt is required daily by the average dairy cow. Rock salt should be placed where the cow can lick it at will.

## THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholas.  
Every Thursday afternoon from The  
Advance Building, Main Street,  
Chinook, Alberta, and entered in the  
postoffice as second class mail matter.

The subscription rates to The  
Advance are \$1.50 per annum in  
advance and \$2.00 outside of Canada.

The transient advertising rates in  
The Advance are—display, 40c per  
inch for first week and 30c for each  
succeeding week, providing no  
change is made. For heavy com-  
position an extra charge is made to  
first week. Reading notices, 10c per  
count line. Legal advertising, 15c  
per count line for first week and 10c  
for each succeeding week. Cards of  
thanks, \$1.00.

Advertisements under this heading  
are charged at the rate of 50c for 21  
words or less per week, with 10c for  
each additional 5 words. Three weeks  
for the price of two.

All letters addressed to the editor  
for insertion in The Advance, must  
be signed to show bona fides of the  
writer. Publication in all cases is  
subject to the judgment of the  
Publisher. We do not necessarily  
concur with views expressed.

a few days visiting with his  
friends here, returned to Mill  
cent Sunday.

Mr. B. Oberas spent the  
week end at his home here.

VERNON KNOWLES

Who is speaking for the chartered  
banks of Canada in a series of non-  
political broadcasts over a Province-  
wide network of Alberta Stations.  
The talks are designed to be in-  
formative and will present facts  
about the functions and operations of  
Canadian banks. The addresses go  
on the air Tuesday evenings from  
10:15 to 10:30 and on Wednesdays  
in the daytime from 1:15 to 1:30.

Canadian Chartered Banks  
through their Public Relations Ad-  
visor, Vernon Knowles, are conduct-  
ing a series of non-political, noncon-  
troversial radio broadcasts on the  
functions and operations of Canadian  
banks. This was learned from Ed-  
monton today.

The first of the series was heard  
Tuesday night, September 7. The  
addresses are being broadcast over  
an all Alberta Network Tuesday  
nights from 10:15 to 10:30 and  
Wednesdays in the daytime from  
1:15 to 1:30.

Mr. Knowles, who homesteader  
in Alberta in 1909, is a former well-  
known newspaperman, who has  
worked on several western daily  
newspapers. He was Editor and  
Manager of the Winnipeg Telegram  
and later Managing Editor of the  
Winnipeg Tribune. He has also  
served in the Parliamentary Press  
Gallery at Ottawa and in the Press  
Galleries of Manitoba, Saskatchewan  
and Ontario. He was Editor and  
Member of the Board of Directors of  
the Toronto Mail and Empire from  
1928 to 1932 and from 1933 to the  
last year was Managing Editor of the  
Toronto Daily Star. In January he  
assumed his present position.

In commenting on the series of  
broadcasts Mr. Knowles laid particu-  
lar stress upon the fact that they  
were designed to be non-political.

### Ladies' Card Club

The Ladies' Card Club re-  
sumed its weekly meeting  
yesterday, Sept. 7th.

Mrs. Todd was hostess and  
honors were shared by Mrs.  
odd and Mrs. Mortimer.  
Mrs. Youell will be hostess to  
the Club Tuesday, Sept. 14th.  
There was the slightest sus-  
sion of the disease so that the  
serum could be administered at  
once.

## THERE IS A REASON

Each year many thousands  
of Alberta grain producers pat-  
ronize Alberta Pool Elevators.  
Sensible, level-headed men, these  
farmers know that it is to their  
interest that Alberta Pool Eleva-  
tors should be the predominant  
grain handling system in this  
province. If you are not already  
a Pool elevator patron think  
over the proposal of being one  
this year.

### Alberta Pool Elevators

#### THEORY AND PRACTICE

Mrs. Lee Cooley and family  
returned from Carstairs when  
they spent the past month  
visiting at the home of Mrs.  
Cooley's parents.

Mr. Mrs. W. S. Warren and  
Mrs. Geo. Hutchinson and son  
Bruce were guests at the home  
of Mr. and Mrs. J. C. Cotts on  
Sunday.

Mrs. Geo. Hutchinson left this  
week for Lonsdale where she  
will visit for a week or two with  
her sister.

Jack Shier of the Peyton  
school district, returned to the  
Chinook Cons. school where he  
will resume his studies.

Mr. J. C. Fawcett motored to  
Lonsdale where he will look over  
his farm land.

### Utmost Caution Urged by Dr. Esler

(CEREAL, Sept. 8 (Special))  
Dr. Esler delivered an address on  
Monday to the adults of Cere-  
al district on the subject of  
infantile paralysis. The doctor  
explained the symptoms and cau-  
sed the disease. He urged a  
parents to exercise the utmost  
caution and bring their children

There is hardly a grain pro-  
ducer but knows that, theoret-  
ically, the co-operative sys-  
tem is the soundest and the  
best. While many thousands  
support their belief in a prac-  
tical way by patronizing co-  
operative institutions such as  
Alberta Pool Elevators, others  
fail to do so. If the theory is  
sound and right it should be  
supported.

### BREWED IN ALBERTA

## BEER

... the FINEST in the West

Of all the brands in Western Canada, none can surpass  
the excellence of these famous Alberta Beers. Pains-  
taking care in brewing and the careful blending of choice  
barley malt, hops and yeast, serve to distinguish  
Alberta's five brands from all others.

By the case at Gov. Vendor Stores  
Served in bottles or on draught at  
all licensed hotels and clubs.
